CHALLENGE & INNOVATION

The Market Gap

- **Market Saturation:** Dominated by soy (consumer resistance) and coconut (high saturated fat, low protein).
- **Clean Label Crisis:** Leading brands rely on modified starches, pectin, and gums.
- **The GUBICO Solution:** A creamy, high-protein chickpea base using upcycled Alcobaça PGI apples.

Core Innovation: Natural Gelation

Lactic-acid fermentation creates a structural network for creaminess with ZERO thickeners or stabilizers. High protein (3.0g/serving) & clean label.

MARKET & STRATEGY

Target Market

Sustainable young adults, health-conscious urbanites. 10.4% of population (910k adults).

Distribution

Phased approach: Vegan Fairs → Specialized Stores (Celeiro) → Premium Retail (El Corte Inglés).

Key Partners

ESOESTE (Chickpeas), Frubaça (Upcycled Apples), BA Glass (Eco-packaging).

Competitive Landscape: GUBICO fills the gap between mass-market soy (Alpro) and ultra-premium coconut (Harvest Moon) by offering national origin and superior functional nutrition.

FINANCIALS & ECO-IMPACT

3-Year Revenue Projection

*Based on Guia (Master Source). **[PULSE Conflict: €88k investment vs €45k]**

Sustainability Value

- **Circular Economy:** Upcycling ~186t of food waste from primary production.
- **Water/Land:** ~90% reduction compared to dairy yogurt production.
- **Carbon Footprint:** 60% lower GHG via domestic chickpea sourcing.
- **Funding Assumption:** 40% Equity / 60% Grant. **[NEEDS CONFIRMATION]**

Investment: €45,000

Pilot Equip: €18k | Marketing: €5k | Compliance: €4k
